

Wed, 05 Dec 2018 22:15:00 GMT probability and computing mitzenmacher upfal pdf - A Bloom filter is a space-efficient probabilistic data structure, conceived by Burton Howard Bloom in 1970, that is used to test whether an element is a member of a set. False positive matches are possible, but false negatives are not – in other words, a query returns either "possibly in set" or "definitely not in set". Elements can be added to the set, but not removed (though this can be ... Sat, 08 Dec 2018 21:14:00 GMT Bloom filter - Wikipedia - In probability theory, concentration inequalities provide bounds on how a random variable deviates from some value (typically, its expected value).The laws of large numbers of classical probability theory state that sums of independent random variables are, under very mild conditions, close to their expectation with a large probability. Such sums are the most basic examples of random variables ... Thu, 06 Dec 2018 15:54:00 GMT Concentration inequality - Wikipedia - A huge list of books about the theory and methods of computing, software development, algorithms, artificial intelligence; computer science monographs Fri, 07 Dec 2018 18:02:00 GMT Books about Programming and Software - ebyte.it -

Algorithm (probabilistic algorithm) randomized algorithm) – a space-efficient probabilistic data structure, conceived by Burton Howard Bloom in 1970, that is used to test whether an element is a member of a set. False positive matches are possible, but false negatives are not – in other words, a query returns either "possibly in set" or "definitely not in set". Elements can be added to the set, but not removed (though this can be ...
